## **Wood Blinds**

Our hardwood blinds are of the highest quality, environmentally conscious, distinctively grained wood available and come with many popular features. Wood blinds come in a wide variety of stains and colors. But that's not all; our wood blinds also come with an Insta-Lock feature that allows you to lock the blind in any position and at any angle you want without a struggle. Our wood blinds have a cord release device to keep your children and pets safe. All our blind materials are lead and V.O.C. free and made without harmful chemicals.

## **Faux Wood Blinds**

Our faux wood blinds come with many features you are sure to love. They are extremely durable and can effectively block out the sun's UV rays to protect your belongings from sun damage. They offer minimal light leakage because they have a tighter closure than other blinds. Additionally, they are also resistant to denting, hard to scratch, and resist fading and yellowing. Faux wood blinds have a cord release device, and faux wood blind slats won't deviate or slide out.

## Horizontal Blinds

Horizontal blinds are one of the most functional and affordable types of window coverings available. They are highly resistant to heat and moisture which makes them the perfect choice for sun-facing rooms, humid bathrooms, laundry rooms and hot, steamy kitchens. But that's not all; these simple blinds are also the essence of functional design. And they are stain resistant and easy to clean as well. Our horizontal blinds are available in a wide variety of colors and textures that can be easily mixed and matched with your existing home decor. Additionally, when closed, horizontal blinds can block the sun's UV rays which helps prevent damage to your furniture, flooring, and any other valuable belongings you might have.

## Vertical Blinds

These blinds are popular because of their distinctive vertical lines. Vertical blinds have a dramatic effect on the appearance of any room, which will help break up the density of any horizon lines. And this shift in the emphasis of a room can really add a decorative layer of warmth and sophistication to just about any space.

### View Blinds for Doors

We have a perfect blind option for [French doors and sliding glass doors](#). The blinds you choose might depend upon the volume of daylight you want to allow. If you prefer to obstruct light completely, choose a blackout roller or honeycomb shade.

## French Door Blinds

French door blinds should enhance the beauty of your doors, and complement the other window treatments in the area. A common problem for French door blinds is that the handles get in the way of functionality. The solution is to purchase shallow blinds for your French doors that fit comfortably between the door and decorative handles.

## Sliding Patio Door Blinds

Sliding doors open vertically so to maximize functionality, you may want a window treatment that opens in the same direction as the door itself. Sliding doors are usually high traffic areas and our wood and faux wood blinds are durable window treatment that can handle the daily use.

## Blinds Between the Glass Doors

Peach Building Products offers ***doors with blinds that are built in between the glass for our sliding glass doors or French door options***. Blinds between the glass doors will block the sun, give you total privacy, and reduce the chances of the blinds from being damaged. Doors that have the blinds between the glass are also safer because they are cordless, and they help reduce indoor allergens because they don't collect dust.

### Commercial Blinds

It doesn't matter if you have a multi-story office building, small professional office, or new construction apartments, ***Peach Building Products has a commercial blind solution for you in a variety of different options***. Faux wood blinds are the most commonly used blinds in apartment buildings because of their low cost and extreme durability.

However, ***before you begin choosing any type of commercial blinds, you should consider what type of lighting and lighting controls are present, your budget, the style you're considering, and the ease of cleaning, and operation any given blind option provides.*** This will help you make an educated decision about which blind option best suits your particular need.
