

Window Shades Company in Utah

 peachbuildingproducts.com/window-shades-company-utah/

Peach Building Products Doors & Windows installs window shades in Utah with brand name fabrics in a rainbow of colors and textures. Whether you want a translucent window covering that simply provides privacy while allowing the maximum light penetration or a full black-out window covering, we have you covered. Even if you have an unusual window size or shape, we can give you a customized option to dress your windows in the style that you prefer. Contact Peach Building Products for a free estimate on new window shades at (801) 566-1255!

Roller Window Shades

Roller window shades are spring loaded window coverings that are rolled around a bar at the top of the window and pulled down to cover the window. Our shades are the perfect choice for homes with pets and kids because there are no dangling cords. When you choose a roller shade, you can ***pick from a manual shade or a motorized option***. The motorized option is perfect for homes or businesses with vaulted ceilings or places with hard to reach windows. With a simple push of a button, you can raise or lower the shades, even adjusting all of the shades in a particular area at once. ***Dual shades*** are another popular option in roller shades. These shades give you the choice of two fabrics—one translucent that provides privacy and light, and one ***blackout shade*** to block out the light.

Roman Window Shades

Roman window shades echo the look of draperies. When raised, the ***fabric gathers in tailored pleats***. While some Roman shade systems use a cord to raise and lower the shade, ours ***do not have cords***. You can choose whether you want a soft fold Roman shade, flat fold shade, or a Batten back shade. The soft fold shades are little more delicate and protrude a little more from the window. The flat fold shades are crisply tailored and feature a profile that is flatter. Batten back shades have a Batten, or backing, sewn into the shade to provide more dimension to the shade when lowered.

Honeycomb Window Shades

Honeycomb shades are made from fabric that is pleated. The pleat forms honeycomb-shaped divisions which trap air. ***Honeycomb window shades provide superior energy efficiency and are perfect for applications where the window may allow too much light, heat, or sound through the window unit.*** Your home will remain cooler in the summer and warmer in the winter with honeycomb shades at the window. Honeycomb window shades provide a lovely choice of window covering in a wide variety of fabrics. You can choose the opacity of the shade, and they also offer the option of raising the shade from the bottom or lowering it from the top, giving you options for privacy that do not exist in other types of shades. If you're concerned about light leakage at night or need to sleep during the day, honeycomb shades provide the most window coverage and light-blocking features. They also have a very narrow profile, so they are perfect to use with valances or other elegant window coverings.

Door Shades

All shade options are available for doors as well. Cover your patio doors or entry doors in style and make it your own with your choice of color, pattern, lift, and light filtering options. You can choose a traditional vertical shade, honeycomb vertical shades or Roman shades for a sliding glass door. (or try Roman shades for a patio door.) Regardless if you need a shade option for a door window or to cover a whole glass door, Peach Building Products Doors & Windows offers an array of window coverings to suit your needs. We stand behind our products and back up every installation with our 100% satisfaction guarantee.
